

IBODigital's sToolTracker Now Available on Microsoft AppSource

Kirchheim, Munich, Germany — September 14, 2020 — IBODigital today announced the availability of sToolTracker on [Microsoft AppSource](#), an online cloud marketplace providing tailored line-of-business solutions.

With its industry, cloud and AI knowledge and experience, IBODigital focuses on developing cloud solutions for industrial businesses in discrete manufacturing. sToolTracker is a modern tool management system for Microsoft Dynamics 365 Business Central and covers the entire tool logistics cycle. From use and maintenance to quarantine, all processes can be easily monitored and conducted without leaving Dynamics 365 Business Central. sToolTracker helps customers save setup time, create more value and improve quality.

Daniel Lemberger, CEO, IBODigital GmbH, said, "What I like most about sToolTracker is that you can quickly interact with it and generate value out of it. The team made great efforts to ensure familiarity within Dynamics 365 Business Central."

Toby Bowers, General Manager, Business Applications Group, Microsoft Corp., said, "We're happy to welcome IBODigital's sToolTracker to Microsoft AppSource, which gives our customers access to the best solutions available from our extensive partner ecosystem. Microsoft AppSource offers partner solutions such as sToolTracker from IBODigital to help customers meet their needs faster."

Get a free trial of sToolTracker at its [page](#) on AppSource.

About IBODigital

IBODigital's mission is to empower industrial companies to achieve more; therefore, IBODigital develops cloud solutions that link manufacturing operations and operators to generate better insights, automate collaboration processes and enable resilient supply chains.
